Allowable Subject Matter

Claims 1-14 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention is directed to relocking vehicle equipped with a hands-free access system. Each independent claim identifies the uniquely distinct features "a second zone (Z2), more extensive than the first zone (Z1), is delimited around the vehicle and in that a relocking is commanded when, after locking of the doors commanded by the hands-free system, a door is opened without action of the hands-free system and then closed again, uniquely insofar as a badge (4) is located within the second zone (Z2)" and "in the case in which an obstacle prevents the locking of the doors of the vehicle (2) when the badge (4) exits the first zone (Z1), a second zone (Z2), more extensive than the first zone (Z1), is delimited around the vehicle (2), and in that a locking is commanded after the prevention stops, uniquely insofar as a badge located in the second zone (Z2)". The closest prior art, Chandebois (US 6,853,296) and Geber et al. (US 6,700,475) discloses conventional "hands-free" vehicle door access systems, either singularly or in combination, fail to anticipate or render the above limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art of Morillon et al. (US 6,522,027), Labonde (US 5,682,135), Mindl et al. (US 6,714,119), and Gernault et al. (US 5,844,470) are cited to show a variety of keyless access control systems for a motor vehicle.
